

PN-900S 900 MHz High Gain Panel Antenna

Panel antenna PN-900 S will give you an excellent extended range and 8 dB gain in 900 MHz band. This antenna can be used for both transmitters and receivers for 900 MHz. Dimension of this antenna is 10" X 8.0" X 0.6". Antenna has an N-type connector and comes with a BNC adapter. This antenna has excellent performances in 900 MHz- 928 MHz range.

Technical Specifications	
Frequency 900-928 MHz	Weight 300 g
Gain 8 dBi	Dimensions 10.0" x 8.0" x 0.6"
Housing Material Rubber- plastic	Case Design Water Resistance
Vertical Beam Width 55 degrees	Radome Material ASA with UV Protection
Impedance 50 Ohm	Operating Temperature -45° C to to 75° C
Connector N type	Polarization Vertical
VSWR < 1.5:1 avg.	Max. Power Input 20 W
